

Step 1

Install the plugin.

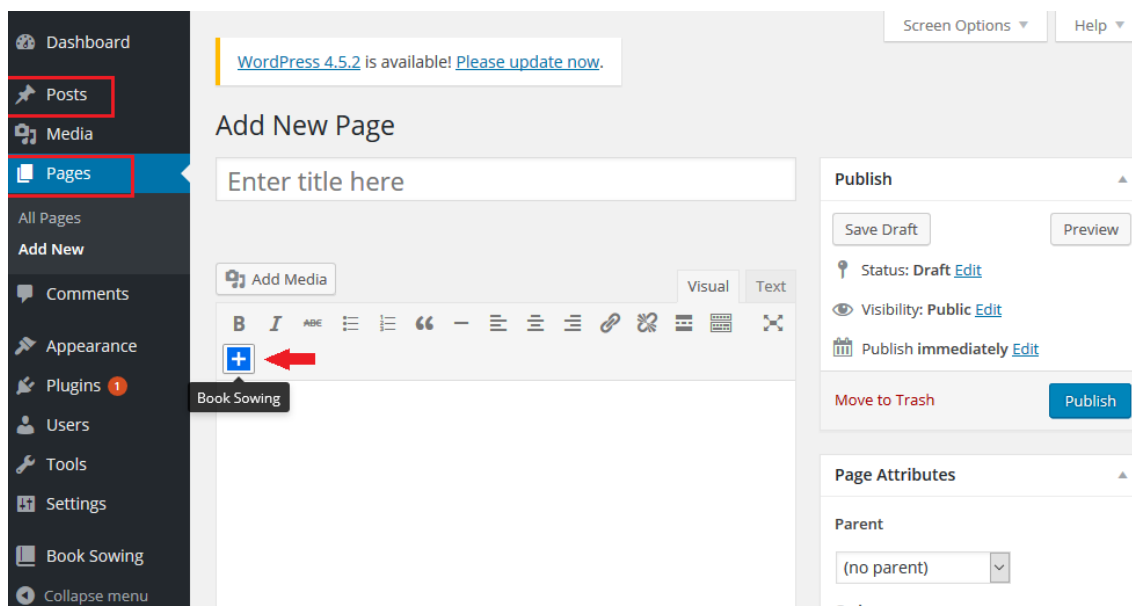

To do this we go to our wordpress **dashboard / plugins / Add New / Upload Plugin** and select the Book Sowing plugin.

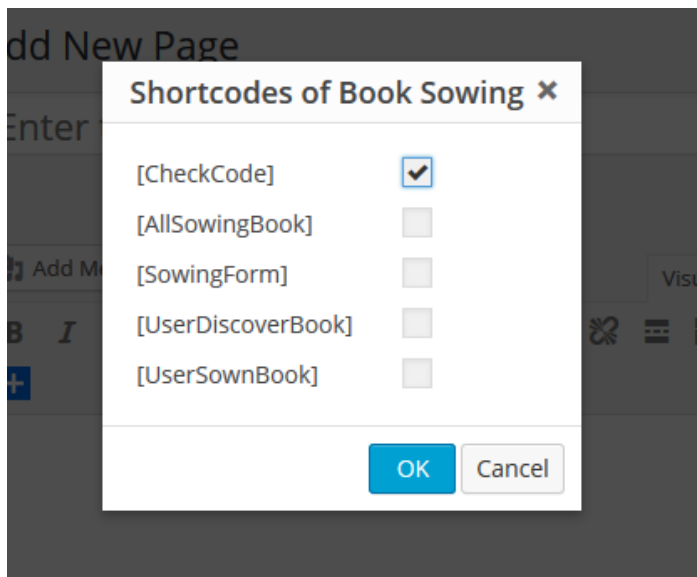

Now, install the plugin and activate it.

Step 2

Enter plugin shortCodes in a "post" or in a "page". To do this, create a new post or page and click on the button where all the shortcodes are.

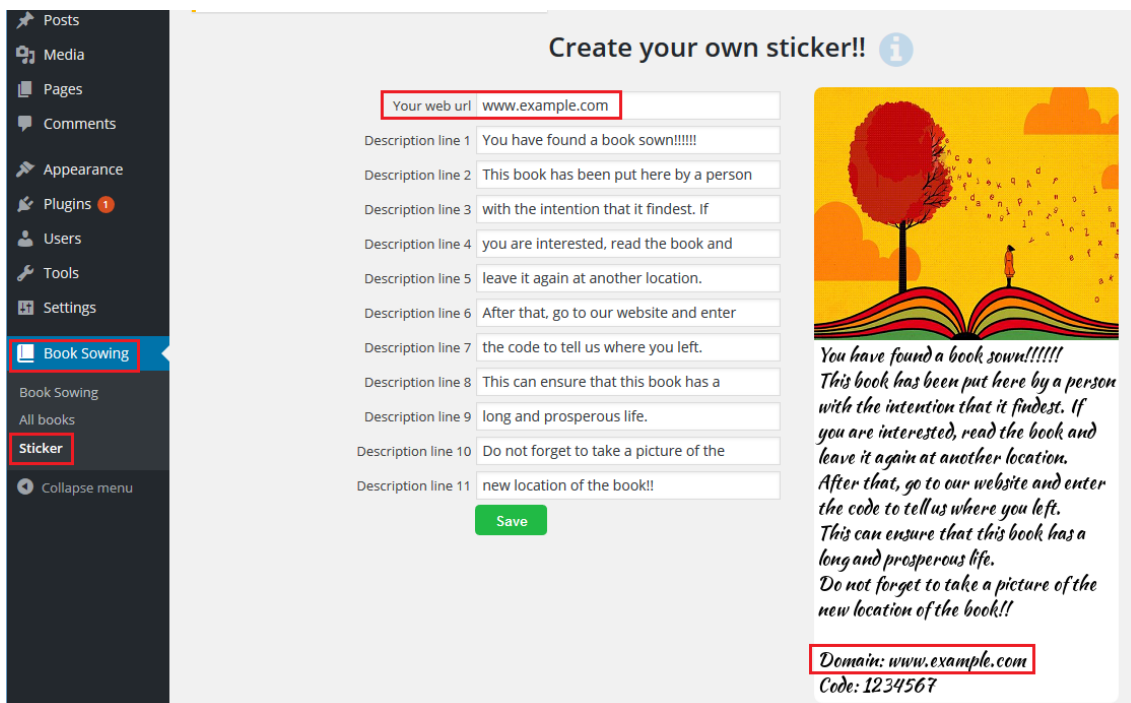

Now, we select the shortcode we are interested in and click accept.

Repeat the same process to use all the needed shortcodes (**I recommend them all**).

Step 3

Finally, we only need to configure the stickers to be download by our users. To do this, go to: **wordpress dashboard / Book Sowing / Sticker**.

In this step is recommended that you change the field "Your web url" and enter the URL of your site, so that when a user finds a sticker, knows in which URL must enter the book code.
